## IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER Monitoring Requirements Not Met

The Jaffrey Water Department violated drinking water monitoring standards. Even though this is not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water for specific parameters/contaminants on a regular basis. Results of regular monitoring are an indicator of whether your drinking water meets health standards. During the third quarter of 2006 we did not complete all monitoring or testing for disinfection byproducts total trihalomethanes (TTHMs) and haloacetic acids (HAA5) and therefore cannot be sure of the quality of our drinking water during that time.

### What should I do?

There is nothing you need to do at this time.

The table below list the parameters/contaminants we did not sample, the calendar quarter in which we were supposed to collect the sample, how many samples we were supposed to take, how many samples were actually taken, and the date on which follow-up samples were and will be taken.

Parameter / Contaminant Name	Sampling Quarter we are required to sample	Number of samples we were required to collect	Number of samples we collected
Total Trihalomethanes (TTHM)	Third Quarter 2006 July – September 2006	2	0
Haloacetic Acids (HAA5)	Third Quarter 2006 July – September 2006	2	0

### Steps we are taking:

This Notice is for violations that occurred in 2006. Proper testing was completed in 2007 which indicated no problems. This omission of testing was discovered upon review of laboratory results and NHDES required report submittals. A copy of this notice will also be distributed with our annual Consumer Confidence Report.

For additional information, contact Randall Heglin, Director of Public Works at 603-532-6521; [rehglin@townofjaffrey.com](mailto:rehglin@townofjaffrey.com) or via mail at 23 Knight Street, Jaffrey, NH 03452.

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
